

Abstract

5 A reclosable bag for filling with at least one food
product. The reclosable bag generally includes at least
one sheet of web material having at least two areas of
structural weakness. At least one fold structure is
located between and defined by the two areas of
structural weakness. An opening is located generally
opposite the fold structure. The reclosable bag further
10 includes a reclosable fastener structure having an
integral skirt structure of skirt web material extending
therefrom. The integral skirt structure includes a
distal margin. The distal margin is coupled to the web
material at, at least one location between the areas of
15 structural weakness and the opening. The reclosable
fastener structure extends past the areas of structural
weakness and into the fold structure. The reclosable bag
capable of being filled with at least one food product
through the opening.
